

seeed Grove - Push button

Grove - Button is a momentary push button. It contains one independent "momentary on/off" button. momentary? means that the button rebounds on its own after it is released. The button outputs a HIGH signal when pressed, and LOW when released.

Product number SE-101020003

Weight 0.008kg

Product description

Seeed Grove - Button

The Grove - Button is a momentary pushbutton that contains an independent "momentary on/off" switch. "Momentary" means that the button automatically returns to its initial position when released. A HIGH signal is output when the button is pressed and a LOW signal when it is released. "Sig" for signal and "NC" for not used are labelled on the circuit board.

The Grove button is easy to use as it is connected via the Grove standard connection and is ready for immediate use. The product supports quick integration into various applications thanks to its "plug and play" functionality.

Typical applications for the Grove button include controlling games, operating lathes, as an on/off switch, as a counter and as a light switch.

Features at a glance

- Momentary pushbutton with automatic return
- Outputs a HIGH signal when pressed and a LOW signal when released
- Grove standard connection for simple connection
- Long electrical service life with up to 200,000 cycles

Compatibility with

- Arduino platforms
- Raspberry Pi platforms
- Grove systems

Technical specifications

- Dimensions: 20 mm x 20 mm
- Operating voltage: 3.3V
- Electrical service life: 200,000 cycles
- Actuating force: 100 ± 50 gf
- Operating temperature range: -25°C to +70°C
- Power supply: External source required (no battery included)

Other data

- Markings "Sig" for signal and "NC" for unused pins on the circuit board

Scope of delivery

- 1x Grove - Button
